

# Powder Coating on Stainless Steel

## Pure Metallics, Colours & Neutrals

A range of colours and finishes applicable to all the products in the collection,

**Dekkor Stainless Steel, finish code -38**, which has been developed to offer new solutions to architects, interior designers and decorators, to improve the creation of spaces, broaden their options and enable big changes through small details. A palette of colours that consists of two types of finish: the "Pure Metallics" showcase the part's metallic appearance, and "Neutrals" and "Colours", which cover the part completely.
